

Membership network

Whether you just need to access the right technical information as an affiliate or you want to gain recognition that you are a professional refrigeration engineer by applying to become a full member (MInstR).

Members of the IOR are drawn from varied backgrounds with many different types of experience and qualification levels. Here are just a few examples of what you can gain from joining.

Design, specifying and consulting engineers

- Codes of Practice
- A route to Chartered Engineer recognition
- Access to downloadable technical information
- Newsletters and regular updates
- Networking events.

“Essential for following safety standard changes” Commercial Director

Installation and service technicians

- A library of practical guides for Service Technicians and Air Conditioning and Heat Pump professionals see www.ior.org.uk/achpi
- Access to downloadable technical information
- Newsletters and regular updates
- Networking events.

“Top quality information and networking” Training Provider

Those working in industrial manufacturing

- Access to industry professionals in other sectors
- Access to guidance on the regulatory framework
- Networking events
- Newsletters and regular updates.

Researchers and academics

- A specialised research network
- Links with international groups
- Opportunities to publish your work and present papers
- Access to downloadable technical information
- Newsletters and regular updates
- Networking events.

“Keeps me up to date with developments and news” Chartered Engineer

Equipment Owners

- Guidance written for end users
- Free tools to help achieve efficiency and reduce leakage
- Access to an archive of case studies of successful applications
- Access to downloadable technical information
- Newsletters and regular updates
- Networking events.

“Valuable contacts and opportunities” Consulting Engineer

Students

- One years free membership to help you find out more about the sector
- Information about innovation and new opportunities
- Access to downloadable technical information
- Networking events.

Challenges we face

The refrigeration and air conditioning industry is continually facing new challenges and as professionals we are expected to provide reliable and independent solutions.

The Institute of Refrigeration is key to developing these solutions. It was formed in 1899 as a membership association to promote the development of refrigeration in all its applications and provide a forum for sharing information. These objectives are ever more important for us today.

Over 2000 individuals now benefit from membership of the IOR. We are part of a vibrant and active community committed to innovation, professional development and sharing of best practice. The IOR is the central point of contact to share, improve and learn more about refrigeration technology from your peers.

Our members include the most influential innovators and practitioners worldwide.

Join us now to gain access to technical downloads, news updates, a programme of free meetings and information about events and initiatives worldwide.

See www.ior.org.uk to find out what the IOR has to offer...

Find out more about membership criteria at www.ior.org.uk/membership or return the reply slip for more information.

An influential voice

The IOR provides a voice for its members on:

The development of new technology – with an annual programme of technical papers and a specialist innovation and research network where industry and academia share experiences at www.sirac.org.uk

Environmental issues – through a range of efficiency guides and tools as well as the REAL Zero refrigerants and leakage minimization campaign offering guidance, tools and training at www.realzero.org.uk

Standards – providing UK representation on European and International safety standards committees and regular updates for members.

International developments – through linkage with the International Institute of Refrigeration and ASHRAE, leading to joint events and publications.

National qualifications – IOR members are closely involved in the development of national qualifications and training standards working with the sector skills council and ACRIB.

Raising the profile of our sector – high profile marketing campaigns to schools and colleges.

Join now

As a registered charity, the Institute of Refrigeration is a non profitmaking organisation. Individual membership, subscriptions, grants and donations are the source of funding for the many initiatives and services we provide. All IOR events and publications are developed and peer reviewed by members of the Institute, with the support of a small permanent secretariat.

Join now to start receiving:

- Invitations to FREE monthly evening lectures and networking meetings
- FREE technical papers and guidance notes
- Codes of Practice at a DISCOUNT PRICE
- Regular Newsletters and updates
- Access to members area at www.ior.org.uk
- IOR Lapel Badge.

Fill in the form below to join as an affiliate or register at www.ior.org.uk/membership (1st year affiliate membership fee for the year March to April is £63 plus a £20 joining fee – check website for latest rates).

If you wish to apply for full membership and the right to use designatory letters such as MInstR (member) or AM InstR (associate) please complete an application form on line. Different membership fees apply and a £20 joining fee is charged.
